

FIG. 1

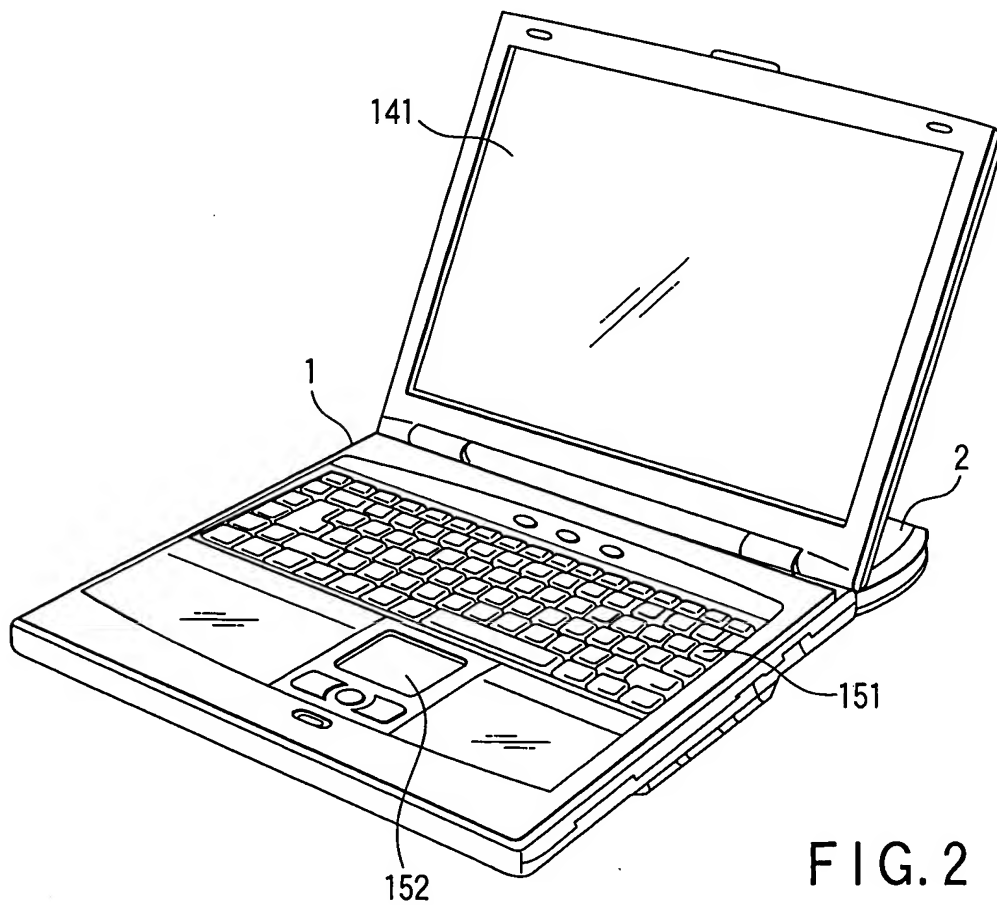

FIG. 2

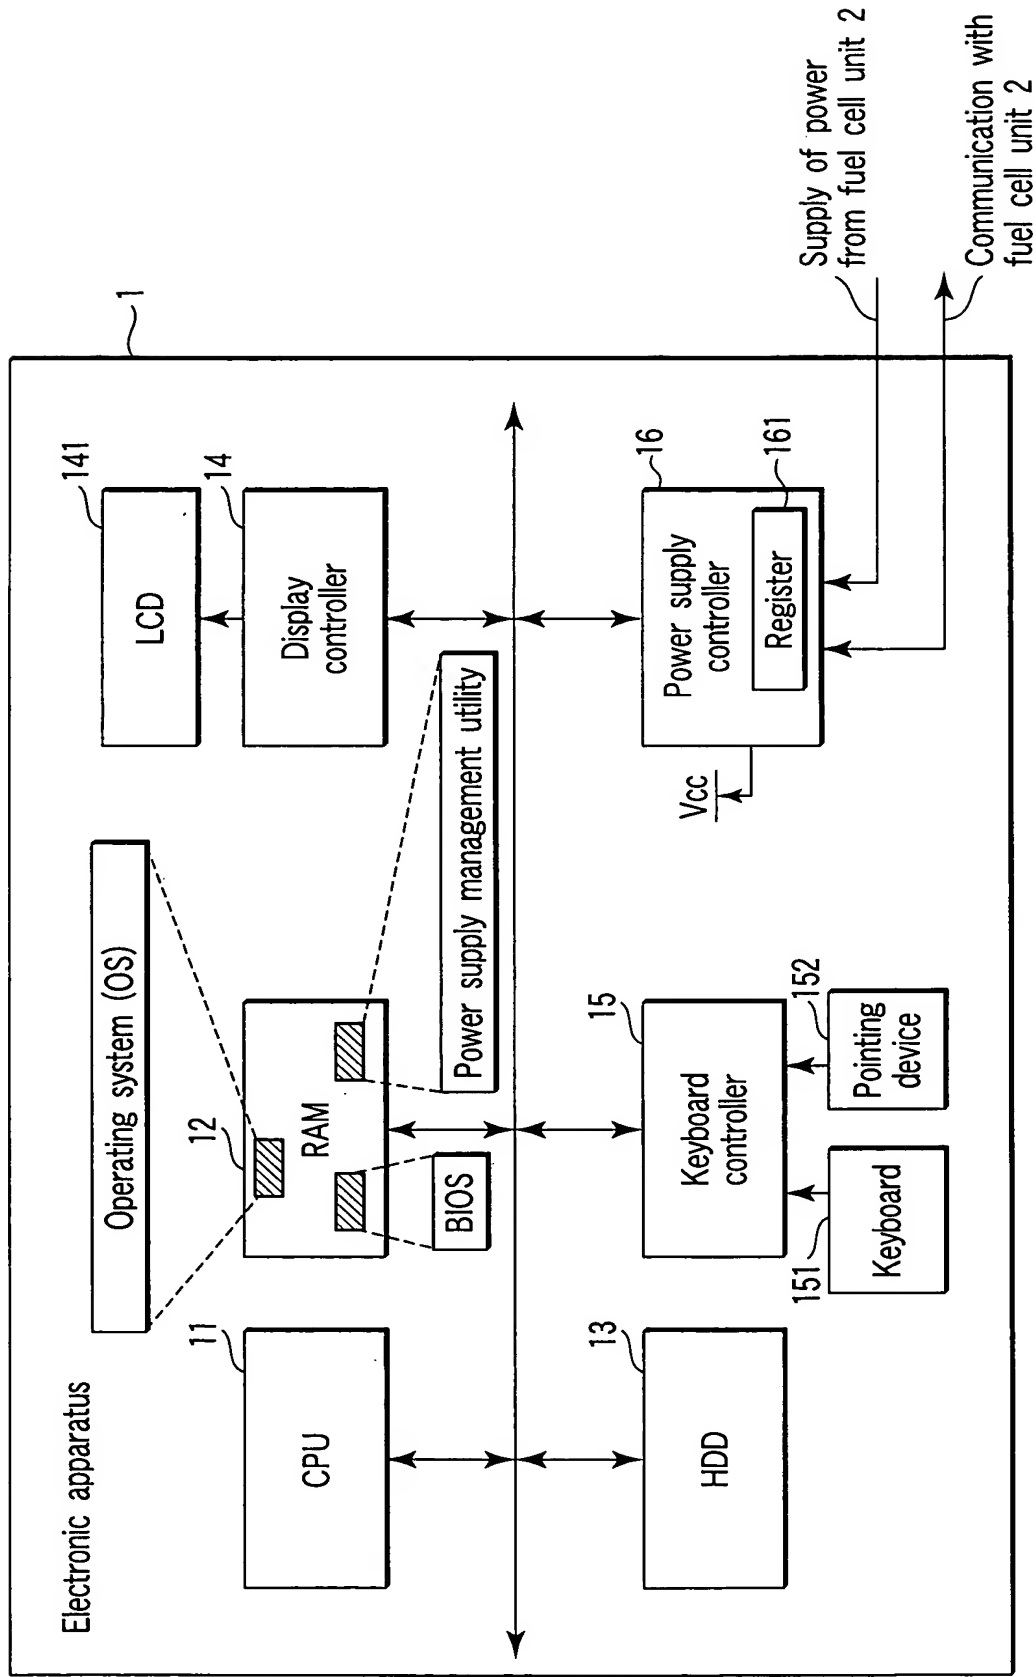

FIG. 3

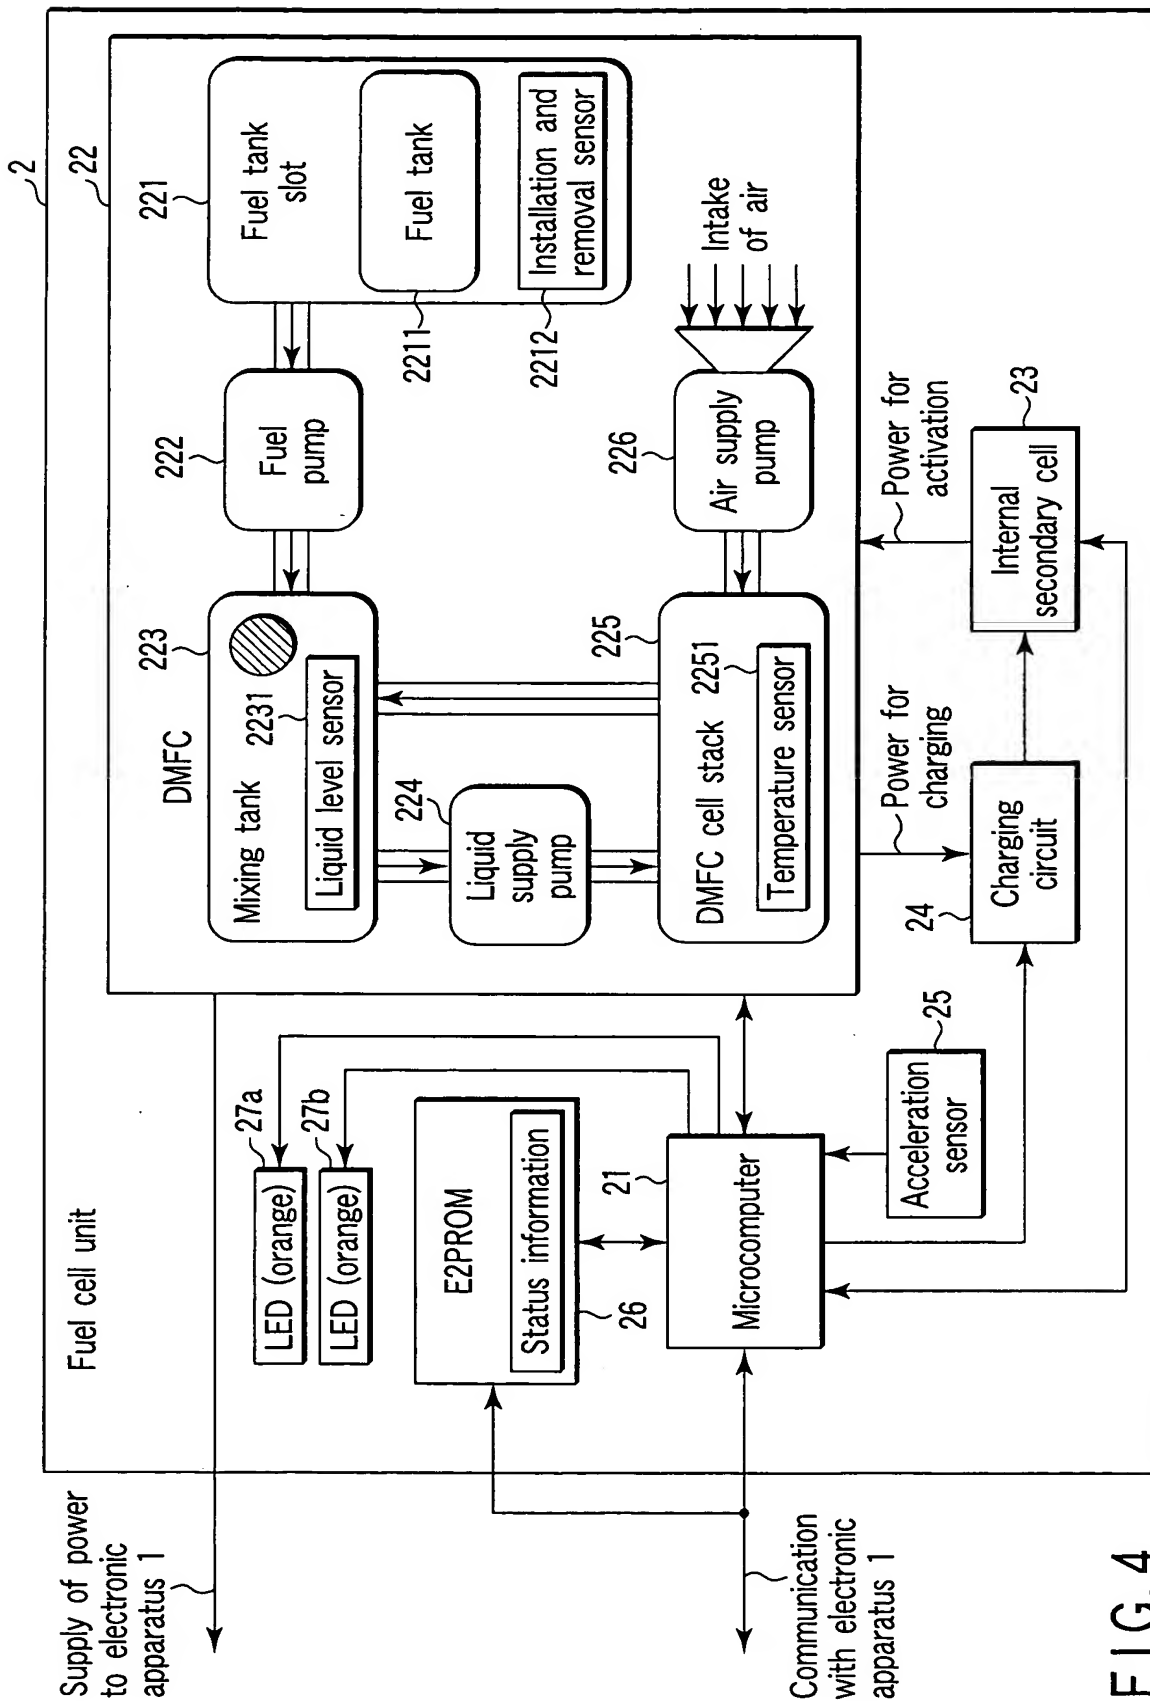

FIG. 4

	LED (orange) blinking factors
1	Inclined
2	High temperature outside DMFC activation temperature range
3	High temperature outside DMFC continuous temperature range
4	Air pump or liquid supply pump is not rotating
5	The amount of liquid in the mixing tank is at a high level for two seconds or longer continuously

FIG. 5

	LED (green) blinking factors
1	Fuel cartridge has not been installed or removed
2	The remaining amount in the fuel cartridge is less than the warning remaining amount
3	Low temperature outside DMFC activation temperature range
4	Low temperature outside DMFC continuous temperature range
5	The amount of liquid in the mixing tank is at a low level for two seconds or longer continuously
